

# Pangea EMR

Django Rest Framework developer position

## Overview:

- <https://pangeaemr.com>
- We build software for doctors and patients.
- Our tech stack:
  - Django
  - Django rest framework
  - Google cloud
  - Vuejs
  - Bootstrap
  - Postgresql
  - Github
  - Gitkraken

## Responsibilities:

- Work on notes feature where doctors would be able to take notes on a patient and provide diagnosis
- Work on integration with pharmacy's so doctors can send prescriptions directly to the pharmacy.
- The candidate should be able to build all required API's in DRF. We use class based APIs. We don't use function based APIs.
- Being able to write test cases in DRF is a plus.

## Key Requirements:

- Be an expert in implementing SOLID principles.
- You are a good person to work with.
- You are willing to learn new things.
- You are hard working.
- You are humble.
- You thrive in environments where you have ownership of the product you build.
- You are not afraid to ask questions.
- You have been working in Python for 5 years, Django for 3 years and DRF for 3 years.

## Compensation:

- 4,00,000 to 10,00,000
- Your starting salary will be based on your experience and expertise.
- Salary increments are based on your performance.
- Each ticket will be allocated certain points. More tickets you complete, the more points you get. At the end of each month you can cash out all points.
